Pallet Placards

FFE has a comprehensive pallet placarding program. Placards are labels attached to a pallet, allowing FFE to identify the pallet associated with a shipment.

Our placards include the FFE PRO number, temperature, all relevant shipper numbers, piece count, and pallet count for each order, as well as the shipper and consignee's name and address. FFE has made these placards available to our customers before pick up by FFE.

Don't hesitate to contact your sales representative for additional questions regarding pallet placarding.
